

MOLL special

The reliable energy source for hobby, solar applications and mobility

MOLL special GEL

The **MOLL special GEL** is a valve regulated lead-acid battery (VRLA) with Calcium/Calcium flat plates with special alloy and gel electrolyte.

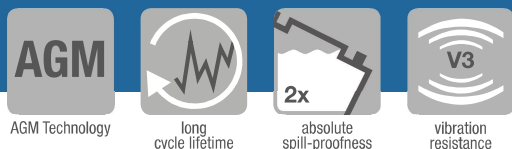

- supply battery for caravans and solar applications
- highest cycling performance in GEL Technology
- absolutely maintenance-free
- absolute spill-proofness

MOLL special AGM

The absorption of the electrolyte in special glass-mat separators (AGM = Absorbent Glass Mat) turns the **MOLL special AGM** into an absolute spill-proof battery in any position, even when the container is damaged.

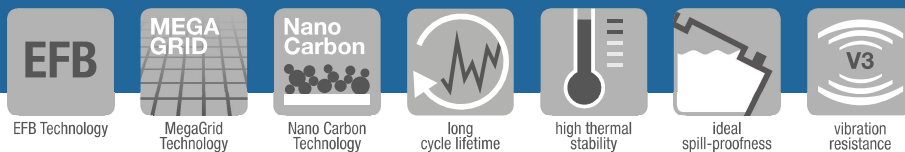

- supply battery
- very high cycling performance in AGM Technology
- absolutely maintenance-free
- absolute spill-proofness

MOLL special EFB

New: **MOLL EFB Technology** with increased cycling performance for power supply.

- mobile energy for electrical drives and lighting
- high cycling performance in EFB Technology
- ideal price-performance-ratio

MOLL type no.	applicable for								capacity			max. outer dimensions [mm]			main application
	MOLL fun	MOLL solar	KAMINA central degassing	vibration resistance level	wet charged	base hold-down	terminal position	terminal type	Ah (100h)	Ah (20h)	Ah (5h)	length	width	height
